

YOUR SHOP. ONE PLACE.

Open the panel. See what arrived. Keep the work moving.

OPEN YOUR PANEL

OPEN YOUR WEBSITE

First visit? Sign in with the Rufcut username and password supplied by Mr. Space. You can enter **rufcut** in the Username field. For a safe first look, choose **Look with sample data** on the sign-in screen.

JUMP TO A TASK

02 / Find new work

03 / Save & print a ticket

04 / Plan a repair

05 / Send a jeans design

06 / Edit text & photos

07 / Stock & labels

08 / Organize the site catalog

09 / Your shortcut guide

10 / Set up your phone

11 / Help & useful links

Buttons, underlined links and the task list are clickable. Screens show the real interface with sample customer data. The live website creates real work orders when you press Send.

02 Everything arrives here.

Repairs and jeans designs share one inbox. No separate email thread is needed to find a request.

Work orders / sample tickets shown

01 Open Work orders

Sign in to your Rufcut panel. From the start guide, choose **New requests and printable tickets**, or open **Work orders**.

02 Find the right job

Choose **Repairs** or **Jean Maker**. Search a ticket, customer name, email or phone; use **Status** to narrow the list.

03 Open ticket

Click the customer card. Inside are the contact details, selections, drawing and workshop fields.

OPEN THE WORK-ORDER INBOX

03 Open it. Work it. Print it.

Every order has a ticket number. Keep fitting measurements, workshop notes and progress together.

Status

Received

Measurements from fitting

Confirm sleeve length at fitting.

Workshop notes

Check patch position with the customer.

SAVE WORK ORDER

PRINT SAVED TICKET

Example repair ticket. Red numbered marks identify the requested work.

01 Read the request

Check the garment or jeans choices, the marked drawing and the customer contact details.

02 Record the fitting

Fill **Measurements from fitting** and **Workshop notes**. Choose the actual work status.

03 Save, then print

Press **Save work order**. Use **Print saved ticket** for an A4 job sheet or **Save as PDF** in your print dialog.

USE THE STATUS THAT MATCHES THE WORK

Received

The request reached the shop.

In progress

The work has started.

Finishing

Final work and checks.

Ready

Ready for the customer to collect.

Completed

The job is closed.

Printing uses the last **saved** values. The sheet is a workshop job ticket; confirm price and payment separately.

04 Mark the work on the garment.

Customers can open Repair from the shop home page or use the dedicated repair page.

▶ Measurements & notes (optional)

Save & add another garment

The shop confirms the work, price and timing.

Review work order

Your progress saves on this device.

Repair Atelier / jacket with Take in and Add a patch selected

01 Choose the garment

Select the piece and fit, then choose the type of work.

02 Place each mark

Select a work type, then tap the garment at the right spot. Drag the numbered mark to adjust it, or use a location button. Use **Save & add another garment** for another piece.

03 Review and send

Continue to **Review work order**. Check every garment, enter name and email, then press **Send work order**. Phone is optional.

05 A design becomes a work order.

The selected jeans design goes directly to the shop panel, together with the customer details.

01 Build the pair

Use **Cut & Denim**, **Color & thread** and **The finish** to choose fit, denim, wash, thread, fly and hem.

02 Open the request

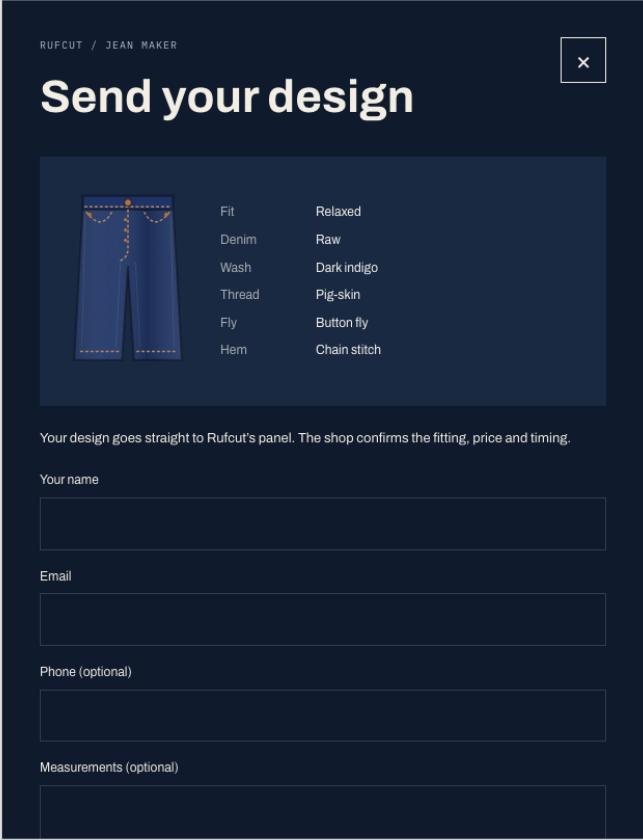

Press **Send this design**. The form shows the choices and the drawing.

03 Add contact details

Name and email are required. Phone, measurements and a note are optional. Scroll down in the form to reach **Send to Rufcut**.

04 Keep the ticket

After a confirmed save, the customer sees a ticket number. The shop finds the same order under **Work orders > Jean Maker**.

The screenshot shows a dark-themed interface for 'RUF CUT / JEAN MAKER'. At the top right is a close button (X). The main heading is 'Send your design'. Below it is a preview of a pair of jeans with a list of selected options: Fit (Relaxed), Denim (Raw), Wash (Dark indigo), Thread (Pig-skin), Fly (Button fly), and Hem (Chain stitch). A note states: 'Your design goes straight to Rufcut's panel. The shop confirms the fitting, price and timing.' Below this are input fields for 'Your name', 'Email', 'Phone (optional)', and 'Measurements (optional)', each with a corresponding text box.

The actual design form. Scroll inside it to reach the remaining fields and Send button.

THE SHOP CONFIRMS THE DETAILS

A submitted design is a request for the workshop. Confirm the final fit, fitting appointment, price and timing with the customer.

OPEN JEAN MAKER

06 Change the right place.

The shared Mr. Space editor names the page area and shows what will change before you send a request.

07 Keep the shelves in sync.

Square supplies the stock catalog. The same panel prepares barcode labels for your products.

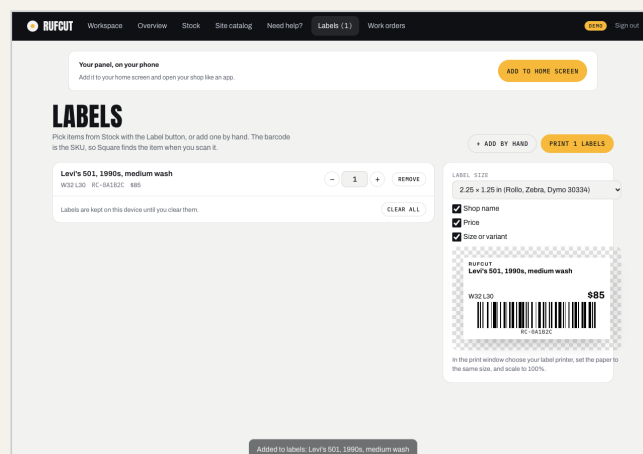

Stock / sample data; demo prices are examples

01 Connect your own Square

In **Overview**, press **Connect Square** and authorize your shop account. Stock tools become available once connected.

02 Update a product

In **Stock**, search the item, change the quantity and press **Save**. Use **Add photos** for product images. Website placement is managed in **Site catalog**.

Print product labels

In **Stock**, press **Label** on an item. Open **Labels**, choose copies and label size, then **Print labels**. Match paper size and use 100% scale.

OPEN THE PANEL

08 Choose what goes where.

Square holds prices, stock and SKUs. Site catalog controls website placement and how choices are displayed.

Same product, two sizes: one card with choices. Preview before saving.

01 Choose the destination

Open **Site catalog**, expand the product and choose **Shop**, **Workshop**, **Repair** or **Square only**. Fees, shipping and deposits normally stay Square only.

02 Group the right choices

Use **One card** for sizes or fabrics of the same product. Use **Separate card for each choice** for different models. Select the included variations and optional website titles.

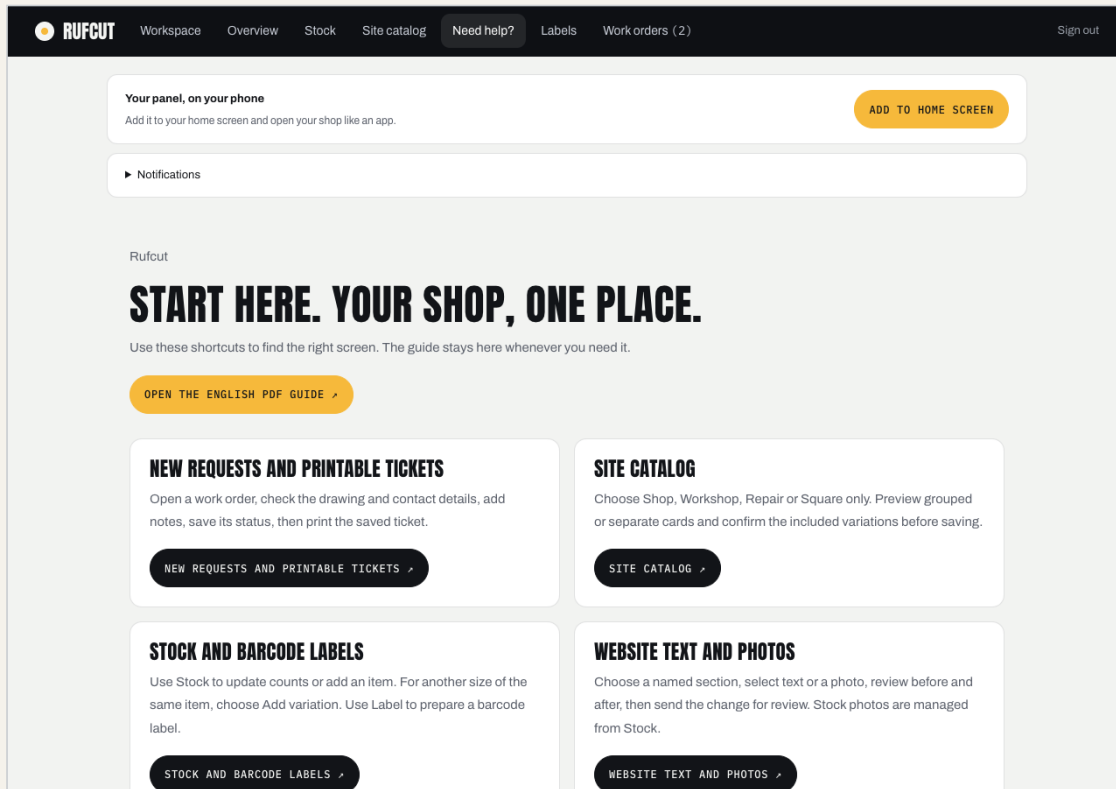

03 Check, confirm and save

Review **Saved placement**, the proposed destination and **Website preview**. Tick the confirmation and press **Save website placement**. Sold-out tracked choices do not appear.

OPEN SITE CATALOG

09 Your shortcuts stay close.

The start guide opens on your first normal panel entry and remains available from Need help?

The panel guide links directly to each daily task and to this PDF.

01 Use the shortcut for your task

Open work orders, Site catalog, Stock or the website editor directly. Read the troubleshooting answers before asking for support.

02 Keep new products organized

For a new product, use **+ Add product or service** and choose its website destination. For another size or fabric, use **+ Add variation to this product**. New Square items and variations stay unpublished until reviewed.

03 Skip the guide when you are ready

At the very bottom of the guide, tick **I know my way around**, then press **Save preference and open my panel**. This preference applies on this device. Reopen **Need help?** any time; untick and save to restore the guide at entry.

OPEN THE SHORTCUT GUIDE

10 Open the shop like an app.

Add the panel to your home screen, then enable notifications on the device you use at the shop.

IPHONE / IPAD

Open the panel in **Safari**. Choose **Share > Add to Home Screen**. If shown, keep **Open as Web App** enabled, then tap **Add**. Open the new icon and sign in there.

ANDROID / CHROME

Tap **Add to home screen** in the panel and follow the install prompt. You can also use Chrome's menu: **Install and create shortcut > Install**. Menu wording varies by version.

TURN ON NEW-WORK ALERTS

Open **Notifications > Phone notifications**. Tap **Enable on this device**, then allow the browser prompt. On iPhone/iPad, do this from the installed home-screen app.

Repeat on each device that needs alerts. Tap a new-work notification to open its ticket; sign in if asked. Signing out disables notifications on that device.

Your panel, on your phone

Add it to your home screen and open your shop like an app.

ADD TO HOME SCREEN

▼ Notifications

Choose how this shop's new work orders reach you.

PHONE NOTIFICATIONS

Get a notification even when this panel is closed.

ENABLE ON THIS DEVICE

On iPhone or iPad, first add the panel to your home screen, open it there, then enable notifications.

EMAIL NOTIFICATIONS

Notification email

shop@rufcut.com

☒ Email me about new work orders

SAVE

Email delivery needs sender setup. Your work orders are saved in the panel while this is being connected.

RUF CUT EMAIL: CONNECT AT HANDOVER

We will connect the shop's own Rufcut sender address when you are ready to switch to the system. Until sender setup is complete, work orders remain available in the panel. Saving an email preference alone does not activate delivery.

11 If something needs a second try.

Keep this PDF on your phone. Its buttons open the live pages or the safe editor preview.

01 A customer cannot send

Check the internet connection and required contact fields, then retry. Failed requests keep their draft on that device. A successful submission shows a ticket number; a repeated retry returns the same saved ticket.

02 An order looks missing

Open **Work orders**, select **All**, clear search and status filters, and press **Refresh**. Check that you are signed into the Rufcut account. The list shows the newest 200 orders.

03 A phone alert does not arrive

Open Notifications and check the device is enabled. Check the browser/phone notification permission. On iPhone/iPad, open from the home-screen app. You can always inspect Work orders directly.

04 Your edit is not on the live website

Saving in the editor prepares a draft. Review and send the request; Mr. Space checks it before publishing. Keep the request receipt or edit link for follow-up.

YOUR CLICKABLE SHORTCUTS

[Shop panel / sign in](#)
